

5 Good Reasons

Why Office Depot is common sense

1. Significant cost savings over OEM

A substantial saving over original brand cartridges without compromising in print quality. Office Depot Re-manufactured Compatible cartridges offer at least the same page yield, the same quality and the same page life as original branded cartridges.

2. High quality alternative to OEM

Office Depot cartridges are manufactured under the highest quality standards. All ink and toner cartridges are manufactured under the ISO 9001 quality standards. Office Depot Re-manufactured Compatible cartridges are dismantled, cleaned, all worn out parts are replaced and all products are post-production tested.

3. 100% worry free satisfaction guarantee

We are so confident of the quality of our cartridges, that we guarantee that every Office Depot Re-manufactured Compatible cartridge is defect free in both materials and workmanship.

4. Compatibility

Our cartridges can be used as a direct replacement for the product originally supplied by the printer manufacturer. As a matter of fact, we guarantee to meet or exceed the OEM page yields.

5. Environmentally friendly

Using re-manufactured cartridges helps to reduce the number of cartridges that are disposed of in landfill sites. Office Depot Re-manufactured Compatible cartridges are comprised of new and recycled parts – anything that cannot be reused is disposed of in an environmentally responsible manner. We care about environmental protection. We provide a free return envelope for every inkjet cartridge and free of charge collection boxes for your toner cartridges in order to have it recycled.

Office Depot's manufacturing partners are certified ISO 14001 companies. A range of Office Depot Re-manufactured Compatible toner cartridges are Nordic Swan certified.
